

BY IDENTIFICATION -

Certain parts and most major assemblies are identified with a part number shown on an attached tag or plate or on the part itself. Reference to identification numbers is made throughout the catalog and cross reference charts are included in some sections to provide immediate knowledge of the service part number when the identification number is known.

IMPORTANT - Identification tags and plates must be retained with the part or assembly with which they are originally supplied.

R. H. and L. H. PARTS

The driver's side is the left hand side of the vehicle and determines whether such parts as fenders, lamps, etc. are right or left hand.

Most Right Hand and Left Hand parts are listed in the manner shown in the following examples. The model application pertaining to the Right Hand part also pertains to the Left Hand part.

EXAMPLE 1 - Right Hand and Left Hand on separate lines

EXPLANATION OF THE FORD PART NUMBERING SYSTEM

For greater convenience this catalog is divided into specific sections; such as brakes, front suspension, engine, transmission, etc. For example, FRONT SUSPENSION appears in Section 30, STEERING in Section 35, REAR AXLE in Section 40, etc. The applicable exploded illustrations are contained in separate sections which are related to the Text Section numbers. For example STEERING Illustrations appear in Illustration Section 35 of the "Illustrations" Catalog, Form FP-7635-B.

The basic part number groups and the section numbers under which each is listed are shown on page 7 of the General Information Section.

The basic part number groups shown on page 7 have been expanded as shown in the Charts on pages 8, 9 and 10 to provide for additional groups to accommodate new lines. In numerical listings, expanded numbers will be considered to follow the same sequence as the regular basic numbers from which they are expanded and are arranged in Catalogs as follows.

3538
3C538
3634
3A634

Illustrations contain basic or group numbers only, therefore, it is necessary to refer to the basic or group within this "text" catalog for complete applicable part numbers.

BODY PARTS GROUP NUMBERING SYSTEM

FOLLOWING IS A DIAGRAM OF THE BODY PARTS GROUP NUMBERING SYSTEM

- These five digits comprise the Body Group Numbers used throughout each body parts section.

A complete group index of body parts has been included at the end of the Alphabetical Index.

IMPORTANT: AS EACH INDIVIDUAL EXPANSION SERIES BECOMES EXHAUSTED OF NUMBERS, ANOTHER SERIES WILL BE ESTABLISHED BY USE OF THE NEXT ALPHABETICAL EXPANSION LETTER SUCH AS "B" thru "Z".

MOTORCRAFT SALES PART NUMBERS

To facilitate the stocking and handling of those service parts which are assigned both service part numbers and Motorcraft Sales Part Numbers, the Motorcraft Sales Part Numbers are shown in parenthesis immediately following or below the service part numbers.

For example, refer to Section 96, Group 9601. The service part number for a carburetor air cleaner element used on a 1969 Mustang with a 6 cylinder 250 C.I.D. engine is C9ZZ 9601-A and the Motorcraft Sales Part Number is FA-68. In the catalog this item will be shown as C9ZZ 9601-A(FA-68).

SYMBOL USED REGULARLY IN CATALOG

★ Symbol indicates part is not supplied for service due to the following:

- a. Part is superseded and replaced as indicated in the description column of text.
- b. Part can be improvised as indicated in the description column of text.
- c. Due to its function there would be little or no demand.

NOTE: ALWAYS REFER TO THE DESCRIPTION COLUMN OF THE TEXT FOR POSSIBLE SUBSTITUTION, OR FOR MATERIAL SPECIFICATIONS AND DIMENSIONS WHICH MAY BE HELPFUL IN OBTAINING THE NON-SERVICED PART LOCALLY.

FORMATS

Various formats are used throughout this catalog to coincide with the normal procedure for selecting the affected part numbers. Most areas of the catalog use a format arranged in the order shown below:

Column -	
1	Model year
2	Type of vehicle or equipment within a specific model year
3	Description, size, etc.
4	Quantity required per vehicle
5	Complete part number

Formats peculiar to a particular area of the catalog are generally self explanatory. When necessary, instructions are shown at the beginning of the affected group. For instance, the various charts and parts list method of cataloging in the Carburetor Section are explained on Page 1 of Section 95.

MODEL YEAR APPLICATION

Model year application is indicated by showing the first year followed by a diagonal line to indicate continued usage in all subsequent years until the insertion of the last year of usage, which will then be inserted after the diagonal line. If no diagonal line is shown, the part is applicable only to the year indicated.

Example:

- 65/ Indicates part used 1965 through 1972 as shown in this catalog, for possible application beyond 1972 see 1973/ Ford Parts Catalog, Form FP 8094-A.
 66/68 Indicates part used 1966 through 1968 model years.
 67 Indicates part used 1967 model year only.
 72 Indicates part used 1972 model year, for possible usage beyond 1973/ see Ford Car Parts Catalog, Form FP 8094-A.

BODY TYPE CODES

Most body parts and some chassis parts are identified by Body Type Codes. A complete listing of body type codes is shown on pages 31 thru 34 of this General Information Section. Similar body types are identified by the same code number; the body type suffix is used to identify a particular body type. For instance, in 1968 (Ford) body type code 54 was used as follows:

1968	A(54A)	Galaxie "500" 4 Door Sedan
	A(54B)	Custom "500" 4 Door Sedan
	A(54C)	"LTD" 4 Door Sedan
	A(54E)	Custom 4 Door Sedan
	A(54)	4 Door Sedans

Body type codes (less suffix) are shown in the model column of the catalog text or with illustration titles when all body types of a related group are affected. For example, when Body Type Code 54 is shown, it includes 54A, 54B, 54C and 54E.

SOFT TRIM

Soft Trim parts are arranged in separate sections by model year i.e. 1965, 1966 etc. Each includes facsimile trim swatches and complete trim codes. To determine the complete part number of a trim part, it is necessary to know the "Trim Code" which is shown on the Warranty Plate or Certification Label of the vehicle (refer to Pages 18 thru 22). Instructions for selecting soft trim parts are contained at the beginning of each Soft Trim Section.

ATTACHING PARTS (NUTS, BOLTS ETC.) and LOCATOR CODES

Standard and utility hardware, such as bolts, screws, fittings, etc. are listed below the part with which they are used. To facilitate the stocking and handling of standard and utility parts by Ford Dealers, locator codes are preassigned by Ford Motor Company. The locator codes are shown in parentheses immediately following or below the standard and utility part numbers. For an example, refer to Body Section 030, Page 1, Group 03014. The part number for a 1/4-20 x 1/2" hex. head bolt is 20308-S8 and the locator code is (B40). In the catalog this item will be shown as 20308-S8 (B40).

 EFFECTIVE WARRANTY DATE

IMPORTANT:
SEE BACK OF CARD

P-8190

Effective dates shown in the catalog, e.g. "Before 12/15/69" and "From 12/15/69" may be determined through interpretation of the build date shown on the owner card. This information corresponds to that shown on the warranty plate from 1965 to 1969.

The numerical position of the build date represents the day of the month.

The alphabetical portion of the build date represents the month in which the unit was built.

For example - 29D indicates

29th day of month

D - April

Refer to page 36 for a complete list of month codes and the corresponding month.
